Involvement Report

https://github.com/IIS-ZPI/ZPI2024_zaoczni_Orzel

Bartłomiej Błaszczyk	Index: 236382
Role: Developer	Group: Orzel_1

Introduction

Project was about developing web application in cooperation with a group. Each member was assigned with a role and tasks to perform in order to complete the project. There were four roles: operation developer, scrum master, programmer and tester. I was assigned role of a programmer and tasks to complete a back-end of our project.

Involvement

My tasks involved:

- Creating end points for the front-end.
  (Fetch data from NBP API #65)

- Fixing bugs related to handling incorrect front-end data.
  (Show error when data is not available - backend side #110)

- Creating: "Gantt chart #49".

- Creating: "System architecture description #52".

- Creating: "Activity diagram #55".
